Independent Auditor's Report

The Board of Directors
Washington County Hospital
Nashville, Illinois

Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of the business-type activities of Washington County Hospital (Hospital), as of and for the years then ended April 30, 2025 and 2024, and the related notes to the financial statements, which collectively comprise the Hospital's basic financial statements as listed in the table of contents.

In our opinion, the accompanying financial statements referred to above present fairly, in all material respects, the respective financial position of the Hospital, as of April 30, 2025 and 2024, and the respective changes in financial position and its cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS) and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States (*Government Auditing Standards*). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Hospital and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Restatement of Prior Year Financial Statements

As discussed in Note 12 to the financial statements, certain errors in classification of cash and cash equivalents and short-term investments were discovered during the current year. Accordingly, the amounts for cash and cash equivalents and short-term investments have been restated in the 2024 financial statements now presented. Our opinion is not modified with respect to this matter.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Hospital's ability to continue as a going concern for twelve months beyond the financial statement date, including any currently known information that may raise substantial doubt shortly thereafter.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS and *Government Auditing Standards* will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS and *Government Auditing Standards*, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Hospital's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Hospital's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control–related matters that we identified during the audit.

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the Management's Discussion and Analysis be presented to supplement the basic financial statements. Such information is the responsibility of management and, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with GAAS, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Reporting Required by *Government Auditing Standards*

In accordance with *Government Auditing Standards*, we have also issued our report dated August 21, 2025, on our consideration of the Hospital's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, grant agreements, and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the Hospital's internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the Hospital's internal control over financial reporting and compliance.

Eide Bailly LLP

Dubuque, Iowa
August 21, 2025

This discussion and analysis of the financial performance of Washington County Hospital (Hospital), provides an overall review of the Hospital's financial activities and balances as of and for the years ended April 30, 2025, 2024, and 2023. The intent of this discussion is to provide further information on the Hospital's performance as a whole. We encourage readers to consider the information presented here in conjunction with the Hospital's financial statements, including the notes thereto to enhance their understanding of the Hospital's financial status.

Overview of the Financial Statements

The financial statements are comprised of the statements of net position, statements of revenues, expenses, and changes in net position, and the statements of cash flows. The financial statements also include notes that explain in more detail some of the information in the financial statements. The financial statements are designed to provide readers with a broad overview of the Hospital's finances.

The Hospital's financial statements offer short and long-term information about its activities. The statements of net position include all of the Hospital's assets and liabilities and provide information about the nature and amounts of investments in resources (assets) and the obligations to Hospital creditors (liabilities). The statements of net position also provide the basis for evaluating the capital structure of the Hospital and assessing the liquidity and financial flexibility of the Hospital.

All of the current year's revenues and expenses are accounted for in the statements of revenues, expenses, and changes in net position. These statements measure the success of the Hospital's operations over the past year and can be used to determine whether the Hospital has successfully recovered all of its costs through its patient service revenue and other revenue sources. Revenues and expenses are reported on an accrual basis, which means the related cash could be received or paid in a subsequent period.

The final statement is the statement of cash flows. These statements report cash receipts, cash payments and net changes in cash resulting from operating, investing, and financing activities. They also provide answers to such questions as where did cash come from, what was cash used for, and what was the change in cash balance during the reporting period.

Financial Highlights

The Statement of Net Position and the Statement of Revenues, Expenses, and Changes in Net Position report the net position of the Hospital and the changes in it. The Hospital's net position - the difference between assets and liabilities - is a way to measure financial health or financial position. Over time, sustained increases or decreases in the Hospital's net position are one indicator of whether its financial health is improving or deteriorating. However, other non-financial factors such as changes in economic condition, population growth and new or changed governmental legislation should also be considered.

- The Statement of Net Position at April 30, 2025, indicates total assets of $19,803,536, total liabilities of $1,483,982, and net position of $18,319,554. The Statement of Net Position at April 30, 2024, indicates total assets of $17,278,521, total liabilities of $2,064,026, and net position of $15,214,495. The Statement of Net Position at April 30, 2023, indicates total assets of $11,370,952, total liabilities of $1,223,516, and net position of $10,147,436.

- The Statement of Revenues, Expenses, and Changes in Net Position for the year ended April 30, 2025, indicates total operating revenues of $19,216,789 increased 2.90% from the previous fiscal year, and total operating expenses of $17,188,474 increased 0.99% from the previous year, resulting in operating income of $2,028,315. Net nonoperating revenues of $1,056,744 and contributions for capital assets of $20,000 brings the change in net position to an increase of $3,105,059. The Statement of Revenues, Expenses, and Changes in Net Position for the year ended April 30, 2024, indicates total operating revenues of $18,674,963 increased 9.84% from the previous fiscal year, and total operating expenses of $17,020,058 increased 6.48% from the previous year, resulting in operating income of $1,654,905. Net nonoperating revenues of $3,412,154 brings the change in net position to an increase of $5,067,059. The Statement of Revenues, Expenses, and Changes in Net Position for the year ended April 30, 2023, indicates total operating revenues of $17,000,232 increased 9.21% from the previous fiscal year, and total operating expenses of $15,983,870 increased 2.97% from the previous year, resulting in operating income of $1,016,362. Net non-operating revenues of $1,072,936 brings the change in net position to an increase of $2,089,298.
- The Hospital's current assets exceeded its current liabilities by $15,337,305 at April 30, 2025, providing a 11.85 current ratio. The Hospital's current assets exceeded its current liabilities by $12,304,684 at April 30, 2024, providing a 6.97 current ratio. The Hospital's current assets exceeded its current liabilities by $6,904,433 at April 30, 2023, providing a 6.72 current ratio.
- The Hospital's total unrestricted days of cash and investments on hand were 242 at April 30, 2025, 195 at April 30, 2024, and 139 at April 30, 2023.
- Gross outpatient charges increased 10.85% during fiscal year 2025, increased 7.88% during fiscal year 2024, and increased 19.55% during fiscal year 2023.
- Net days in accounts receivable were 58 days at April 30, 2025, 56 days at April 30, 2024, and 52 days at April 30, 2023.
- Statistical information:
    - 175- Acute patient days of care (14% increase)
    - 833- Swing-bed and respite patient days of care (8% decrease)
    - 4,437- Extended Care patient days of care (12% decrease)
    - 2,986- Radiology procedures (1% decrease)
    - 25,629- Physical Therapy treatments (16% increase)
    - 2,486- Emergency Room visits (10% decrease)

Long-Term Debt and Lease Liabilities

The Hospital had $4,218 and $-0-, respectively, in short-term and long-term debt and lease liabilities at April 30, 2025, $12,632 and $4,218, respectively, in short-term and long-term debt and lease liabilities at April 30, 2024, and $131,052 and $16,849, respectively, in short-term and long-term debt and lease liabilities at April 30, 2023. Remaining revenue bonds were repaid in May 2023 and restricted funds related to the debt were released to operations.

Economic and Other Factors and Next Year's Budget

The Hospital's Board and management considered many factors when preparing the fiscal year 2026 budget. Primary consideration in the 2026 budget are the unknowns of healthcare transformation, reform, and the continued difficulty in the status of the economy.

Items listed below were also considered:

- Recruitment of key providers to meet primary care, surgical, and procedural needs
- Transformation of delivery approaches driven by the COVID-19 experience and value-based care
- Impacts of continued tangible 340B changes over past year
- Increased care authorization demands due to payer mix shifts
- Medicare and Medicaid reimbursement rates
- Significant workforce availability/shortages
- Increase in self-pay accounts receivable due to uninsured and underinsured
- Increased expectations for quality at a lower price (competition, cash constraints, aging facility)
- Competitive salaries/benefits and the Illinois minimum wage changes
- Patient safety initiatives
- Technology advances
- Medical staff issues
- Declining patient volumes
- State budget crisis
- Significant capital needs
- Payer requirements to preauthorize more services
- Overall decline in people willing to work in health care
- Continued shift from inpatient to outpatient services
- Age of facility
- Gap of current wages to market
- Increase in Medicare Advantage plans that don't provide for cost-based reimbursement
- Uncertainty around Medicaid eligibility
- Continued administrative burden to report information related to price transparency
- Commercial payer contractual price limitations vs higher inflation rates

Summary

The Hospital's Board of Directors and Management continue to be extremely proud of the excellent patient care, dedication, commitment, and support each of our employees provide to every person they serve. We would also like to thank each member of the Hospital's medical staff for their dedication and support provided.

Contacting the Hospital's Finance Department

The Hospital's financial statements are designed to present users with a general overview of the Hospital's finances and to demonstrate the Hospital's accountability. Note 1 - Reporting Entity and Summary of Significant Accounting Policies

The financial statements of Washington County Hospital (Hospital) have been prepared in conformity with generally accepted accounting principles in the United States of America. The *Governmental Accounting Standards Board* (GASB) is the accepted standard-setting body for establishing governmental accounting and financial reporting principles. The significant accounting and reporting policies and practices used by the Hospital are described below.

Reporting Entity

The Hospital, located in Nashville, Illinois, is a 22-bed public hospital established in accordance with the provisions 70 ILCS 910 of Illinois Hospital District Law and governed by a Board of Directors. The Hospital primarily earns revenues by providing inpatient, outpatient, and emergency care services to patients in Nashville, Illinois, and the surrounding area.

For financial reporting purposes, the Hospital has included all funds, organizations, agencies, boards, commissions, and authorities. The Hospital has also considered all potential component units for which it is financially accountable, and other organizations for which the nature and significance of their relationship with the Hospital are such that exclusion would cause the Hospital's financial statements to be misleading or incomplete. The GASB has set forth criteria to be considered in determining financial accountability. These criteria include appointing a voting majority of an organization's governing body, and (1) the ability of the Hospital to impose its will on that organization or (2) the potential for the organization to provide specific benefits to or impose specific financial burdens on the Hospital. The Hospital has no component units which meet the GASB criteria.

Measurement Focus and Basis of Accounting

Basis of accounting refers to when revenues and expenses are recognized in the accounts and reported in the financial statements. Basis of accounting relates to the timing of the measurements made, regardless of the measurement focus applied.

The accompanying financial statements have been prepared on the accrual basis of accounting in conformity with GAAP. Revenues are recognized when earned, and expenses are recorded when the liability is incurred.

Basis of Presentation

The statement of net position displays the Hospital's assets and liabilities, with the difference reported as net position. Net position is reported in the following categories/components:

> *Net investment in capital assets* consists of net capital assets reduced by outstanding balances for bonds, notes, capital lease obligations, and other debt attributable to the acquisition, construction, or improvement of those assets.

Restricted net position:

Expendable – expendable net position results when constraints placed on net position use are either externally imposed or imposed by law through constitutional provisions or enabling legislation.

Nonexpendable – nonexpendable net position is subject to externally imposed stipulations which require them to be maintained permanently by the Hospital.

Unrestricted net position consists of net position not meeting the definition of the preceding categories. Unrestricted net position often has constraints on resources imposed by management which can be removed or modified.

When an expense is incurred that can be paid using either restricted or unrestricted resources (net position), the Hospital's policy is to first apply the expense toward the most restrictive resources and then toward unrestricted resources.

Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements. Estimates also affect the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Cash and Cash Equivalents

Cash and cash equivalents include highly liquid investments with an original maturity of three months or less, excluding internally designated or restricted cash and investments. For purposes of the statement of cash flows, the Hospital considers all cash and investments with an original maturity of three months or less as cash and cash equivalents.

Short-Term Investments

Short-term investments include certificates of deposits with an original maturity of three to twelve months, excluding internally designated or restricted cash and investments.

Patient Receivables

Patient receivables are uncollateralized patient and third-party payor obligations. Unpaid patient receivables are not charged interest on amounts owed. Payments of patient receivables are allocated to specific claims identified in the remittance advice or, if unspecified, are applied to the earliest unpaid claim.

The carrying amount of patient receivables is reduced by a valuation allowance that reflects management's estimate of amounts that will not be collected from patients and third-party payors. Management reviews patient receivables by payor class and applies percentages to determine estimated amounts that will not be collected from third parties under contractual agreements and amounts that will not be collected from patients due to bad debts. Management considers historical write off and recovery information in determining the estimated bad debt provision.

Employee Retention Tax Credit Receivable

The Coronavirus Aid Relief, and Economic Security Act provided an employee retention credit (the credit) which is a refundable tax credit against certain employment taxes for eligible employers. The Consolidated Appropriations Act of 2021 and the American Rescue Plan Act of 2021 expanded the availability of the credit, extended the credit through September 30, 2021, and increased the credit to 70% of qualified wages, capped at $7,000 per quarter. As a result of changes to the credit, the maximum credit per employee increased from $5,000 in 2020 to $21,000 in 2021. During the year ended April 30, 2024, the Hospital recognized a $2,748,166 benefit related to the credit, which included $300,000 in accrued interest, and which is presented in the statement of revenue, expenses and changes in net position as nonoperating revenue. At April 30, 2024, the Hospital had a corresponding $2,748,166 receivable. During the year ended April 30, 2025, the Hospital recorded $359,193 in additional accrued interest, bringing the receivable to $3,107,359 at April 30, 2025. Subsequent to April 30, 2025, the Hospital received payment in full on all three quarters outstanding.

The Hospital's credit filings remain open for potential examination by the Internal Revenue Service through the statute of limitations, which has varying expiration dates extending through 2027. Any disallowed claims resulting from such examinations could be subject to repayment to the federal government.

Supplies

Supplies are stated at lower of cost (first-in, first-out) or market and are expensed when used.

Assets Limited as to Use or Restricted

Assets limited as to use include assets set aside by the Board of Directors for future capital improvements, over which the Board retains control and may, at its discretion, subsequently use for other purposes.

Restricted funds are used to differentiate resources, the use of which is restricted by donors or grantors, from resources of general funds on which donors or grantors place no restriction or which arise as a result of the operations of the Hospital for its stated purposes.

Investment Income

Interest on cash and deposits is included in nonoperating revenues and expenses.

Capital Assets

Capital assets are capitalized at historical cost, or estimated historical cost for assets where actual historic cost is not available. Donated capital assets are recorded at acquisition value at the date of donation. Acquisition value is the price that would have been paid to acquire an asset with equivalent service potential on the date of the donation. The Hospital maintains a threshold level of $5,000 or more for capitalizing capital assets. The cost of normal maintenance and repairs that do not add to the value of the asset or materially extend asset lives are not capitalized.

Capital assets are depreciated using the straight-line method over their estimated useful lives. Land is not depreciated. The estimated useful lives of capital assets are as follows:

Land improvements	10-20 years
Buildings and improvements	5-40 years
Equipment	3-15 years

Gifts of long-lived assets such as land, buildings, or equipment are reported as additions to unrestricted net position and are excluded from revenues in excess of expenses before contributions for capital assets. Gifts of long-lived assets with explicit restrictions that specify how the assets are to be used and gifts of cash or other assets that must be used to acquire long-lived assets are reported as restricted net position.

Right-to-Use Leased Assets

Right-to-use leased assets are recognized at the lease commencement date and represent the Hospital's right to use an underlying asset for the lease term. Right-to-use leased assets are measured at the initial value of the lease liability plus any payments made to the lessor before commencement of the lease term, less any lease incentives received from the lessor at or before the commencement of the lease term, plus any initial direct costs necessary to place the lease asset into service. Right-to-use leased assets are amortized over the shorter of the lease term or useful life of the underlying asset using the straight-line method.

Amortization for right-to-use leased assets is included in depreciation and amortization expense in the financial statements. The amortization period for these assets can vary from 3 to 5 years.

Impairment of Long-Lived Assets

The Hospital considers whether indicators of impairment are present and performs the necessary analysis to determine if the carrying values of assets are appropriate. No impairment was identified for the years ended April 30, 2025 and 2024.

Compensated Absences

Hospital employees accumulate a limited amount of earned but unused vacation hours for subsequent use or for payment upon termination, death, or retirement. Employees also accumulate a bank of leave to use for extended illness that is paid at time of use. The cost of projected vacation payouts and use of extended illness bank is recorded as a liability on the statement of net position based on pay rates that are in effect at April 30, 2025 and 2024.

Lease Liabilities

Lease liabilities represent the Hospital's obligation to make lease payments arising from the lease. Lease liabilities are recognized at the lease commencement date based on the present value of future lease payments expected to be made during the lease term. The present value of lease payments are discounted based on a borrowing rate determined by the Hospital.

Operating Revenues and Expenses

The Hospital's statement of revenues, expenses, and changes in net position distinguishes between operating and nonoperating activities. Operating revenues and expenses of the Hospital result from exchange transactions associated with providing healthcare services – the Hospital's principal activity, and the costs of providing those services, including depreciation and amortization, and excluding interest cost. All other revenues and expenses are reported as nonoperating.

Net Patient Service Revenue

The Hospital has agreements with third-party payors that provide for payments to the Hospital at amounts different from its established rates. Payment arrangements include prospectively determined rates, reimbursed costs, discounted charges, and per diem payments. Net patient service revenue is reported at the estimated net realizable amounts from patients and third-party payors, and others for services rendered, including estimated retroactive adjustments under reimbursement agreements with third-party payors and a provision for uncollectible accounts. Retroactive adjustments are accrued on an estimated basis in the period the related services are rendered and adjusted in future periods as final settlements are determined.

Charity Care

The Hospital provides care to patients who meet certain criteria under its charity care policy without charge or at amounts less than its established rates. Since the Hospital does not pursue collection of these amounts, they are not reported as revenue. The amounts of charges foregone for services provided under the Hospital's charity care policy were approximately $42,000 and $70,000 for the years ended April 30, 2025 and 2024. Total direct and indirect costs related to these foregone charges were approximately $21,000 and $37,000 at April 30, 2025 and 2024, based on an average ratio of cost to gross charges.

The Illinois legislature passed a bill titled the "Hospital Uninsured Patient Discount Act" (Act). This Act requires hospitals to provide certain mandated discounts from charges to the uninsured in Illinois. Charges are to be discounted to 135% of cost. Furthermore, a hospital may not collect more than 25% of an uninsured family's gross income in any one year.

County Tax Revenue

The Hospital records tax revenue received from Washington County, Illinois. The property taxes are recognized as revenue in the period that the County collects and remits the receipts to the Hospital.

Grants and Contributions

The Hospital may receive grants as well as contributions from individuals and private organizations. Revenues from grants and contributions (including contributions for capital assets) are recognized when all eligibility requirements, including time requirements, are met. Grants and contributions may be restricted for either specific operating purposes or for capital purposes. Amounts that are unrestricted or that are restricted to a specific operating purpose are reported as non-operating revenues. Amounts restricted to capital acquisitions are reported after revenues in excess of expenses before contributions for capital assets.

Adoption of New Standard

The Hospital adopted GASB Statement No. 101, *Compensated Absences*. The provisions of this standard modernize the types of leave that are considered a compensated absence and provides guidance for a consistent recognition and measurement of the compensated absence liability. There was not a significant effect on the Hospital's financial statements as a result of the implementation of this standard.

Note 2 - Net Patient Service Revenue

The Hospital has agreements with third-party payors that provide for payments to the Hospital at amounts different from its established rates. A summary of the payment arrangements with major third-party payors follows:

Medicare: The Hospital is licensed as a Critical Access Hospital (CAH). The Hospital is reimbursed for most inpatient and outpatient services under a cost reimbursement methodology with final settlement determined after submission of annual cost reports by the Hospital and are subject to audits thereof by the Medicare Administrative Contractor (MAC). The Hospital's Medicare cost reports have been audited by the MAC through the year ended April 30, 2023.

The Rural Health Clinics (RHC) are designated as a Certified (Provider Based) Rural Health Clinics by the Medicare program. As a result, clinical services rendered to Medicare program beneficiaries are reimbursed under a cost reimbursement methodology.

Medicaid: Inpatient acute care services rendered to Medicaid program beneficiaries are paid at prospectively determined rates per discharge. These rates vary according to a patient classification system that is based on clinical, diagnostic, and other factors. Outpatient services rendered to Medicaid program beneficiaries are reimbursed based on a fee schedule. A hospital specific adjustment factor is prospectively applied to the outpatient fee schedule to adjust the fee schedule to approximate cost.

Outpatient services related to Medicaid program beneficiaries are paid based on an Enhanced Ambulatory Procedure Grouping system, in which claims are paid based on clinical, diagnostic, or other factors.

Other Payors: The Hospital has also entered into payment agreements with certain commercial insurance carriers and other organizations. The basis for payment to the Hospital under these agreements may include prospectively determined rates per discharge, discounts from established charges, and prospectively determined daily rates.

Concentration of gross revenues by major payor accounted for the following percentages of the Hospital's gross patient service revenues for the years ended April 30, 2025 and 2024:

	2025	2024
Medicare	51%	48%
Medicaid	6%	7%
Commercial payors	38%	39%
Self pay	5%	6%
	100%	100%

Laws and regulations governing the Medicare, Medicaid, and other programs are extremely complex and subject to interpretation. As a result, there is at least a reasonable possibility that recorded estimates will change by a material amount in the near term. The net patient service revenue for the years ended April 30, 2025 and 2024 increased approximately $200,000 and $384,000 due to removal of allowances previously estimated that are no longer necessary as a result of final settlements, adjustments to amounts previously estimated, and years that are no longer likely subject to audits, reviews, and investigations.

Illinois Hospital Medicaid Incentive Programs

The State of Illinois enacted legislation that provides for a hospital assessment program, which has been approved by the federal Centers for Medicare and Medicaid Services (CMS) and has been extended through December 31, 2026. All Illinois hospitals (excluding publicly owned hospitals) pay the State an assessment each year. The assessments in part fund additional Medicaid payments.

The legislation requires the State of Illinois and Managed Care Organizations (MCO's) to make timely payment of direct and pass-through payments to hospitals in Illinois. The Illinois Department of Healthcare and Family Services is permitted to adjust the rates used in the fixed rate direct payments if volumes fluctuate so the anticipated total spending level is achieved.

As a result of these programs, additional Medicaid payments included in net patient service revenue were approximately $347,000 and $375,000 for the years ended April 30, 2025 and 2024.

Note 3 - Deposits and Investments

Custodial credit risk is the risk that in the event of a bank or investment company failure, the Hospital's deposits may not be returned to it. State law allows collateralization of deposits in excess of federal depository insurance. The Hospital's deposit policy for custodial credit risk is to obtain a pledge of collateral for deposits substantially in excess of federal depository insurance. None of the Hospital's deposits were either uninsured or uncollateralized as of April 30, 2025 and 2024.

At April 30, 2025 and 2024, the Hospital's carrying amounts of deposits and investments are as follows:

	2025	2024
Checking, savings, and money market accounts	$ 6,025,252	$ 3,952,886
Certificates of deposit	5,074,501	4,863,465
	$ 11,099,753	$ 8,816,351

Cash and deposits are reported in the following statement of net position captions:

	2025	2024
Cash and cash equivalents	$ 4,973,832	$ 3,146,093
Short-term investments	5,052,698	4,842,491
Assets limited as to use or restricted	1,073,223	827,767
	$ 11,099,753	$ 8,816,351

Note 4 - Capital Assets

Capital asset additions and transfers, deductions, and balances for the years ended April 30, 2025 and 2024, are as follows:

	April 30, 2024 Balance	Additions and Transfers	Deductions	April 30, 2025 Balance
Capital Assets Not Being Depreciated				
Land	$ 62,855	$ -	$ -	$ 62,855

Total Capital Assets and Right-to-Use Leased Assets, Net	$ 2,192,072			$ 2,086,262

Note 5 - Leases

The Hospital has certain leasing arrangements for the use of equipment and a clinic building which are summarized below.

The Hospital has entered into an agreement to lease equipment. The lease term is for 5 years. The lease term began in September 2020 with final payment due in August 2025. The Hospital utilized a risk free rate of 0.26%.

Remaining obligations associated with the equipment lease is as follows:

Year Ending April 30,	Principal	Interest	Total
2026	$ 4,218	$ 2	$ 4,220

The Hospital entered a building lease with a related party for one of its rural health clinics. The initial lease term was for two years, with an option to extend the lease for an additional two years. The lease term began in January 2020 with final payment made January 2024. This building is now leased on a month-to-month basis. Total lease payments on the building for each of the years ended April 30, 2025 and 2024 were $88,200, which were paid to an estate in which a hospital board member is the executor.

Note 6 - Compensated Absences

	April 30, 2024 Balance	Additions	Payments	April 30, 2025 Balance	Amounts Due Within One Year
Compensated absences	$ 500,849	$ 122,775	$ -	$ 623,624	$ 553,624
Less current portion				(553,624)	
Compensated absences, less current portion				$ 70,000	

	April 30, 2023 Balance	Additions	Payments	April 30, 2024 Balance	Amounts Due Within One Year
Compensated absences	$ 461,537	$ 39,312	$ -	$ 500,849	$ 500,849
Less current portion				(500,849)	
Compensated absences, less current portion				$ -	

Note 7 - Pension and Retirement Benefits

The Hospital has a defined contribution pension plan under which substantially all employees become participants upon completion of a consecutive 12-month period, during which the employee works at least 1,000 hours. The Hospital contributes to the plan in accordance with the plan agreement. The Hospital contributes 2.5% of eligible full-time employee compensation. Full time employees must contribute 4% of their compensation. Part time employees are required to contribute an amount equal to 2% of their compensation. Employees have the option of contributing up to 10% of their regular compensation.

Vesting of employer contributions occur on a graduated scale based on years of service. Currently, all contributions are invested in various funds with One America. Employees hired after May 1, 1994, will be 100% vested after five years of continuous employment. Those hired prior to May 1, 1994, were vested 60% after three years and 20% each of the following two years until 100% vesting was reached at the fifth-year anniversary of employment. Benefits are paid upon retirement under four different annuity options with optional surviving spouse benefits. Total retirement plan expense for the years ended April 30, 2025 and 2024, was $138,505 and $111,313.

Note 8 - 340B Program

The Hospital participates in the 340B Drug Pricing Program (340B Program) enabling the Hospital to receive discounted prices from drug manufacturers on outpatient pharmaceutical purchases and enter into contracts with unrelated pharmacies who provide certain prescription drugs to Hospital outpatients. This program is overseen by the Health Resources and Services Administration (HRSA) Office of Pharmacy Affairs (OPA). HRSA is currently conducting routine audits of these programs at health care organizations and increasing its compliance monitoring processes. Laws and regulations governing the 340B Program are complex and subject to interpretation and change. As a result, it is reasonably possible that material changes to financial statement amounts related to the 340B Program could occur in the near future. During 2025 and 2024, the Hospital recognized $710,720 and $557,247 of other operating revenue related to the 340B Program.

Note 9 - Concentration of Credit Risk

The Hospital grants credit without collateral to its patients, most of whom are insured under third-party payor agreements. The mix of receivables from third-party payors and patients at April 30, 2025 and 2024 was as follows:

	2025	2024
Medicare	33%	36%
Medicaid	5%	5%
Commercial insurance	43%	44%
Other third-party payors and patients	19%	15%
	100%	100%

Note 10 - Contingencies

Risk Management

The Hospital is exposed to various risks of loss from torts; theft of, damage to, and destruction of assets; errors and omissions; employee injuries and illnesses; natural disasters; and employee health, dental, and accident benefits. Commercial insurance coverage is purchased for claims arising from such matters other than employee health claims. Settled claims have not exceeded this commercial coverage in any of the three preceding years.

Malpractice Insurance

The Hospital has malpractice insurance coverage to provide protection for professional liability losses on a claims-made basis subject to a limit of $1 million per claim and an annual aggregate limit of $3 million. Should the claims-made policy not be renewed or replaced with equivalent insurance, claims based on occurrences during its term, but reported subsequently, would be uninsured.

Excess Liability Umbrella Insurance

At April 30, 2025 and 2024, the Hospital has excess liability umbrella coverage subject to a limit of $2 million and $4 million per occurrence and an annual aggregate limit of $2 million and $4 million, respectively.

Litigation, Claims, and Disputes

The Hospital is subject to the usual contingencies in the normal course of operations relating to the performance of its tasks under its various programs. In the opinion of management, the ultimate settlement of any litigation, claims, and disputes in process will not be material to the financial position, operations, or cash flows of the Hospital.

The healthcare industry is subject to numerous laws and regulations of federal, state, and local governments. Compliance with these laws and regulations, specifically those relating to the Medicare and Medicaid programs, can be subject to government review and interpretation, as well as regulatory actions unknown and unasserted at this time. Federal government activity has increased with respect to investigations and allegations concerning possible violations by healthcare providers of regulations, which could result in the imposition of significant fines and penalties, as well as significant repayments of previously billed and collected revenues from patient services.

Note 11 - Management and Affiliation Agreement

The Hospital and SSM Health Care Corporation, d/b/a SSM Health, have a management agreement. SSM Health provides management, administrative, and professional services to the Hospital. The Hospital also has an additional affiliation agreement with SSM Health for electronic health records (EHR) remote access and services. During the years ended April 30, 2025 and 2024, the Hospital paid SSM Health $899,835 and $917,594, respectively, for these services. At April 30, 2025 and 2024, the Hospital had a payable to SSM Health of $80,463 and $169,859 for these services, respectively.

During the years ended April 30, 2025 and 2024, the Hospital recognized $11,471 and $20,768, respectively, as rent revenue for unused clinic space from SSM Health, included as nonoperating revenue on the statements of revenues, expenses, and changes in net position. In addition, the Hospital had a receivable from SSM Health of $20,765 and $26,746 for this rent, respectively.

Note 12 - Restatement

During the year ended April 30, 2025, an error was identified in the previously issued statement of cash flows for the year ended April 30, 2024. Certificates of deposit not limited as to use or restricted, in the amount of $4,842,491, were previously included as cash and cash equivalents on the statement of net position. They have been reclassified and are now being reported as short-term investments on the statement of net position. In addition, a $20,974 certificate of deposit was included as cash and cash equivalents on the statement of cash flows and should not have been. Accordingly, amounts were adjusted to properly reflect these balances.

	As Originally Reported	Restatement	As Restated
Purchases of noncurrent and short-term investments	$ -	$ (4,863,465)	$ (4,863,465)
Net cash from (used for) investing activities	237,534	(4,863,465)	(4,625,931)

Independent Auditor's Report on Supplementary Information

The Board of Directors
Washington County Hospital
Nashville, Illinois

We have audited the financial statements of Washington County Hospital (Hospital) as of and for the years ended April 30, 2025 and 2024, and have issued our report thereon dated August 21, 2025, which contained an unmodified opinion on those financial statements. Our audit was performed for the purpose of forming an opinion on the basic financial statements taken as a whole.

The schedules of net patient service revenue, other operating revenues, operating expenses, and statistical information are presented for the purposes of additional analysis and are not a required part of the financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The schedules of net patient service revenue, other operating revenues, and operating expenses have been subjected to the auditing procedures applied in the audits of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated in all material respects in relation to the financial statements as a whole. The schedules of statistical information on page 36 have not been subjected to audit procedures and as such, we do not express an opinion on them.

Independent Auditor's Report on Internal Control Over Financial Reporting and on Compliance and Other Matters Based on an Audit of Financial Statements Performed in Accordance with *Government Auditing Standards*

The Board of Directors
Washington County Hospital
Nashville, Illinois

We have audited, in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States (*Government Auditing Standards*), the financial statements of Washington County Hospital (Hospital) as of and for the year ended April 30, 2025, and the related notes to the financial statements, and have issued our report thereon dated August 21, 2025.

Report on Internal Control over Financial Reporting

In planning and performing our audit of the financial statements, we considered the Hospital's internal control over financial reporting (internal control) as a basis for designing audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Hospital's internal control. Accordingly, we do not express an opinion on the effectiveness of the Hospital's internal control.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the Hospital's financial statements will not be prevented or detected and corrected on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies and therefore, material weaknesses or significant deficiencies may exist that were not identified. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. We identified certain deficiencies in internal control, described in the accompanying Schedule of Findings and Responses as items 2025-01 and 2025-02 that we consider to be significant deficiencies.

Report on Compliance and Other Matters

As part of obtaining reasonable assurance about whether the Hospital's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the financial statements. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

Hospital's Responses to Findings

Government Auditing Standards requires the auditor to perform limited procedures on the Hospital's responses to the findings identified in our audit and described in the accompanying Schedule of Findings and Responses. The Hospital's response was not subjected to the other auditing procedures applied in the audit of the financial statements and, accordingly, we express no opinion on the responses.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the Hospital's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the Hospital's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

Eide Bailly LLP

Dubuque, Iowa
August 21, 2025

Part I: Findings Related to the Financial Statements:

Significant Deficiency:

2025-01 Preparation of Financial Statements and Audit Adjustments

Criteria – A properly designed system of internal control over financial reporting includes the preparation of an entity's financial statements and accompanying notes to the financial statements by internal personnel of the entity. Management is responsible for establishing and maintaining internal control over financial reporting and procedures related to the fair presentation of the financial statements in accordance with U.S. generally accepted accounting principles (GAAP).

Condition – The Hospital does not have an internal control system designed to provide for the preparation of the financial statements, including the accompanying footnotes and statement of cash flows, as required by GAAP. As auditors, we were requested to draft the financial statements and accompanying notes to the financial statements. Also, adjusting journal entries were proposed and made to the financial statements during the audit.

Cause – The outsourcing of these services is not unusual in an organization of your size. We realize that obtaining the expertise necessary to prepare the financial statements, including all necessary disclosures, in accordance with GAAP, can be considered costly and ineffective.

Effect – The effect of this condition is that the year-end financial reporting is prepared by a party outside of the Hospital. The outside party does not have the constant contact with ongoing financial transactions that internal staff have. Furthermore, it is possible that new standards may not be adopted and applied timely to the interim financial reporting. Accordingly, interim financial statements may be misstated as well.

Recommendation – It is the responsibility of Hospital management and those charged with governance to make the decision whether to accept the degree of risk associated with this condition because of cost or other considerations. We recommend that management continue reviewing operating procedures in order to obtain the maximum internal control over financial reporting possible under the circumstances to enable staff to draft the financial statements internally and make any necessary adjustments on a regular basis.

Response – This finding and recommendation is not a result of any change in the Hospital's procedures, rather it is due to an auditing standard implemented by the American Institute of Certified Public Accountants. Management feels that committing the resources necessary to remain current on GAAP and GASB reporting requirements and corresponding footnote disclosures would lack benefit in relation to the cost but will continue evaluating on a going forward basis.

Findings Related to the Financial Statements (continued):

Significant Deficiency:

2025-02 Segregation of Duties

Criteria – An effective system of internal control depends on an adequate segregation of duties with respect to the execution and recording of transactions, as well as the custody of an organization's assets. Accordingly, an effective system of internal control will be designed such that these functions are performed by different employees, so that no one individual handles a transaction from its inception to its completion.

Condition – Certain employees perform duties that are incompatible.

Cause – The limited number of office personnel prevents a proper segregation of accounting functions necessary to ensure optimal effective internal control. This is not an unusual condition in organizations of your size.

Effect – The lack of segregation of duties increases the risk of fraud related to misappropriation of assets, financial statement misstatement, or both. Limited segregation of duties could result in misstatements that may not be prevented or detected on a timely basis in the normal course of operations.

Recommendation – We realize that with a limited number of office employees, segregation of duties is difficult. We also recognize that in some instances it may not be cost effective to employ additional personnel for the purpose of segregating duties. It is the responsibility of management and those charged with governance to determine whether to accept the degree of risk associated with this condition because of cost or other considerations. In addition, all adjusting journal entries should be reviewed by someone on the management team, in conjunction with account reconciliations, to ensure reasonableness of the journal entries made.

However, the Hospital should continually review its internal control procedures, other compensating controls and monitoring procedures to obtain the maximum internal control possible under the circumstances. Management involvement through the review of reconciliation procedures can be an effective control to ensure these procedures are being accurately completed on a timely basis. Furthermore, the Hospital should periodically evaluate its procedures to identify potential areas where the benefits of further segregation of duties or addition of other compensating controls and monitoring procedures exceed the related costs.

Response – Management agrees with the finding and has reviewed the operating procedures of the Hospital. Due to the limited number of office employees, management will continue to monitor the Hospital's operations and procedures. Furthermore, management will continually review the assignment of duties to obtain the maximum internal control possible under the circumstances.
